

ZHYRAK WHITEPAPER

Version 1.0 – August 2025

1. Introduction

Zhyrak is a DeFi initiative designed to create a sustainable ecosystem based on staking, fair rewards, and targeted airdrops. Unlike traditional crypto projects that focus on short-term gains, Zhyrak is committed to empowering its community through a transparent governance system and distributing incentives fairly to contributors. With the native token \$ZHY, we invite holders to actively participate in ecosystem governance and earn rewards as a sign of appreciation.

2. What is Zhyrak?

Zhyrak is a Web3 protocol that integrates: - Governance-based staking: \$ZHY holders can lock tokens to gain voting rights in ecosystem decision-making. - Fair reward distribution: All staking rewards are allocated based on real contribution, voting participation, and the amount staked. - Targeted airdrops: Distributed to holders meeting proof-of-holding criteria and active community members.

3. Airdrop System

The Zhyrak airdrop is designed to ensure rewards go to those who genuinely contribute: - Proof-of-Holding: Only wallets holding \$ZHY for a set period receive airdrops. - Community Activity: Engagement in forums, governance discussions, and events counts towards eligibility. - Phased Distribution: Airdrops are released in stages to ensure sustainability and prevent massive dumps.

4. Governance Staking

Unlike conventional APY-based staking, Zhyrak uses a governance staking model where: - Token holders lock \$ZHY to gain voting rights in strategic decisions. - Staking rewards are shared proportionally based on staked amount and governance participation. - Community votes decide treasury allocation, airdrop schedules, partnerships, and project direction. Advantages of this system: - Prevents token inflation caused by high APYs. - Ensures rewards go to active participants, not passive investors. - Gives full power to the community to shape the ecosystem's future.

5. Conclusion

Zhyrak is a community-driven DeFi ecosystem that puts token holders at the heart of decision-making. Through governance staking and targeted airdrops, we ensure every community member is rewarded in proportion to their contribution. With Zhyrak, your ownership is your voice, and your voice shapes the future.
